///
A fun app to create your date night when you don't know what to do. This project utilizes Jquery, API's, DOM, Local Storage, CSS, and HTML.

Date Night App

A fun little weather app with basic design. Utilizes local storage to remember search history. Uses Jquery, an API, CSS, and HTML.

Weather App

A day planner that uses a timer to display a different color depending on time of day. Previous is white, current green, future red. Utilizes Javascript, CSS, and BootStrap as well as local storage.

Day Planner App
